Joint bio-based composites stand at COMPOSITES EUROPE 2014

The unique opportunity to efficiently present your bio-based solutions!

For the first time, there will be a specially focused, dedicated presentation of bio-based composites at the COMPOSITES EUROPE 2014 in Düsseldorf, 7-9 October. To make this happen, the nova-Institute and COMPOSITES EUROPE joined forces and arranged a joint stand devoted to bio-based composites. The stand will feature all composite solutions with reinforcement by natural, wood or cellulose fibres, bio-based thermoplastics and thermosets as matrix for glass and carbon fibres, and of course fully bio-based composites with wood and natural fibres.

Since 2006 the annual trade fair attracts an international audience from sectors such as automotive, aerospace, mechanical engineering, building and construction industries or wind energy. 11,000 visitors from more than 60 countries are expected this year. The joint bio-based composites stand is located in Hall 8b where fibres and fibre products are on display.

Find details about participation in the leaflet attached.
