The Biotechnology Industry Organization (BIO) is the world's largest biotechnology trade association. We provide advocacy, business development, and communications services for more than 1,100 members worldwide. We promote the use of industrial enzymes, conversion of biomass to energy and chemicals, and innovative clean up technologies.

BIO hosts the World Congress on Industrial Biotechnology which is the world's largest and most significant industrial biotechnology event for business leaders, high-profile scientists, investors and policy makers in biofuels, biobased products, and renewable chemicals. The World Congress on Industrial Biotechnology will take place July 19–22, 2014 in Montreal. www.bio.org/worldcongress

BIO also hosts the Pacific Rim Summit on Industrial Biotechnology and Bioenergy, which is the original conference dedicated solely to the growth of the industrial biotechnology and bioenergy sectors in the Asia-Pacific region. This year's event will be held in December 7–9, 2014 in San Diego. www.bio.org/pacrim
