

### Company

Foreverest Resources Ltd. is a family-owned company that specializes in bio-based chemicals. With over 30 years of experience in researching and developing forest chemical products, we are a leading supplier of natural plant chemicals, offering natural alternatives and derivatives of bio-based chemicals. Our portfolio includes modified resins, terpene-based derivatives, flavour and fragrance ingredients, and other pine chemicals.

We provide efficient procurement solutions, optimized resource allocation, and cutting-edge bio-based chemical products. Backed by decades of industry expertise and a robust network of manufacturing partners and technical specialists, we deliver reliable and tailored pre-sale and after-sale services for industries including detergents and disinfectants, flavours and fragrances, adhesives and coatings, pharmaceuticals and personal care, food and beverages, and agrochemicals and cleaning products.

### Fields of activity

Foreverest Resources is committed to actively driving the application and development of the global renewable carbon economy and sustainable solutions through our unique bio-based product lines. We understand that the future of the chemical industry lies in reducing reliance on fossil resources and shifting towards renewable, bio-based carbon sources. Our products are a direct embodiment of this vision:

- ✧ **Modified Resins:** Derived from natural rosin, these enhance product performance while increasing bio-content, contributing to greener supply chains.
- ✧ **Terpene-based Derivatives:** Extracted from gum turpentine, they offer bio-based alternatives for flavours, fragrances, and solvents, significantly reducing carbon footprint.
- ✧ **Flavour and Fragrance Ingredients:** Providing natural or bio-based synthetic options, meeting market demand for sustainable products.
- ✧ **Other Pine Chemicals:** Directly utilising renewable forestry resources, transforming by-products into high-value chemicals, supporting a circular bioeconomy model.

Some of our products have been certified by the BioPreferred Program.

### Foundation

- 1988

### Key topics

- Gum rosin (resins) derivatives
- Gum turpentine derivatives
- Plant extract ingredients
- Polyterpene resin derivatives

### Key services

- Bio-based chemicals supply
- Bio-based chemicals export
- Bio-based ingredient R&D

### More information

<https://foreverest.net/products>

## Application Market

- Adhesives & Sealants & Tackifiers
- Agriculture & Feed
- Coatings & Paints, Inks
- Electrical & Electronics
- Flavour & Fragrance
- Food & Nutrition
- Healthcare & Pharma
- HI&I Cleaning Care
- Industrial
- Personal Care

## Selected customers
