Company

NatureWorks LLC is a company dedicated to meeting the world's needs today without compromising the earth's ability to meet the needs of tomorrow. NatureWorks LLC is the first company to offer a family of commercially available, low-carbon-footprint naturally advanced Ingeo™ lactides and biopolymers derived from renewable and abundant natural resources with performance and economics that compete with petroleum-based intermediates, plastics and fibers, and provide brand owners new cradle-to-cradle options after use of their products. NatureWorks is jointly owned by Thailand's largest chemical producer, PTT Global Chemical, and Cargill, an international producer and marketer of food, agricultural, financial, and industrial products and services. For more information about NatureWorks and Ingeo, visit www.natureworkslc.com.

Innovative products made with Ingeo, an ingenious and naturally advanced material made from renewable and abundant natural resources.

Nativia La Mia Ensalata utilizing Ingeo film

Electrolux s-bag® GREEN dust bags made from Ingeo fibers

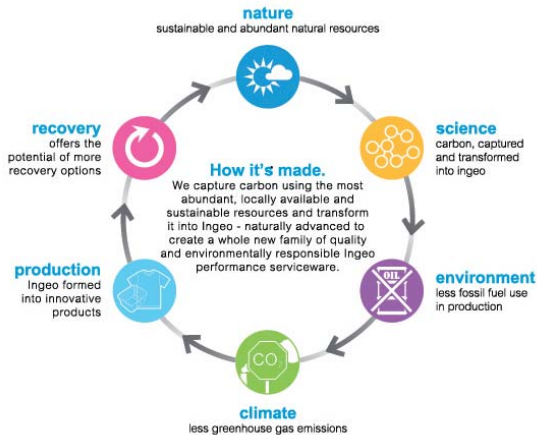

3Dom Ingeo-based filament used in 3D printing

Danone yogurt cups made from Ingeo plastic

About Ingeo

Ingeo is the world's first performance material whose manufacture shows a significant reduction in greenhouse gas emissions. Made from naturally advanced materials, Ingeo is derived from renewable and abundant natural resources.

How is Ingeo made?

Carbon is captured in these plant resources, sequestered from the atmosphere during plant photosynthesis and stored as plant starches. NatureWorks LLC uses dextrose derived from these starches as the starting point for Ingeo. Through a process of fermentation, separation and polymerization, the carbon and other elements in these natural sugars are transformed into the family of Ingeo grades captured in this resin guide.

Where is Ingeo used?

Ingeo is used uniquely to create a full and diverse range of finished consumer goods marketed under the Ingeo brand. Bridging both plastics and fiber categories, Ingeo is fueling innovation and spearheading a whole raft of creativity across a wide range of products from packaging, foodservice, automotive, electronic, and durable goods, to personal care products, clothing, and homewares.
