

## acib GmbH

### Foundation

- 2010

### Employees

- approx. 200

### Branches

- Biocatalysis & Enzyme Technology
- Polymer & Environmental Biotechnology
- Systems Biology & Microbial Cell Factories
- Bioprospecting & Synthetic Biology
- Bioprocessing Technology
- Animal Cell Technology & Engineering

### **Austrian Centre of Industrial Biotechnology (acib)**

acib is a **private research institution** with **25+ years of experience**. It is a **multidisciplinary centre** with research in several key disciplines: Organic Chemistry/Biocatalysis, Molecular-, Structural-, and Cell Biology, (Bio)Process Engineering, Bioinformatics and Synthetic Biology.

In addition to its approx. **200 employees**, acib has **framework contracts with several scientific partners** in Austria, Italy, Germany, Spain, Slovenia, Poland and Taiwan (e.g. Graz University of Technology, University of Natural Resources and Applied EMBL - European Molecular Biology Laboratory Heidelberg, Hamburg University of Technology, University of Pavia, Autonomous University of Barcelona,...). acib can thereby provide their expertise and equipment (in addition to our own) to the industry and act as a **hub for industrial biotechnology in Europe**.

acib has secured a budget from 2010-2019 of **more than EUR 125 millions** with international contributions **from small start-up companies to multinational companies** such as BASF, DSM, Evonik, Sandoz, Boehringer Ingelheim, Clariant, 3M, Lonza, etc. (in total >80 companies).

acib offers **excellent R&D possibilities**:

- **long-term project** (co-)development **with industry**
- flexible **contract research**
- reliable **partnership** in international funding programs
