

Product Information

8" Switchgrass	150ft./ pallet
12" Switchgrass.....	135ft./ pallet
18" Switchgrass.....	50ft./ pallet
24" Switchgrass.....	30ft./ pallet

Custom sizes and lengths available upon request

A sturdy polypropylene geotextile (woven) that has been engineered specifically for controlling erosion and containing and/or retaining sediment in disturbed areas. It is a mesh tube filled with Switchgrass material that is placed perpendicular to sheet-flow runoff. The Switchgrass Filter, which is oval to round in cross section, provides a three-dimensional filter that retains sediment and other pollutants (e.g., suspended solids, tannic acid, nitrates, phosphate's and motor oil) while allowing the cleaned water to flow through. The Switchgrass Filter can be used in place of traditional sediment and erosion control tools such as a silt fence, straw bale barrier and mulch socks. This product and process is patent pending.
