- Plastics
- Polyurethanes
- Fibers

Company Overview

Headquartered in the United States, in the heart of the midwest, Omni Tech International (OTI) provides technical, commercial and business consulting services to universities, corporations, and government entities.

Consulting Divisions

Our company has been in the biobased sector for more than 35 years. Omni Tech's experienced consultants have over 500 years combined expertise in engineering, product development and marketing in the chemical industry. We are ready to lead organizations through

challenging sustainability and commercialization projects. Our expertise and knowledge of feedstocks, technologies, product sales, supply chain, policy, financing and environmental impact will accelerate your biobased product development and commercialization cycle.

Biobased Commercialization Services

MARKET UNDERSTANDING

Market research, competitive analysis and business plan development

CUSTOMER NEEDS

Technology assessment, value proposition development and market opportunity validation

COMMERCIAL PREPARATION

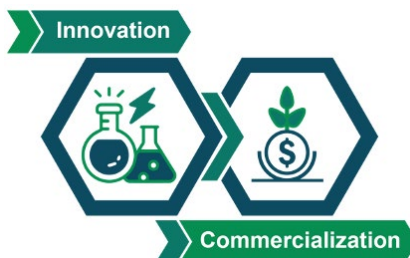

Strategy development, project management and regulatory compliance

For over 27 years, Omni Tech International has also maintained a unique partnership with the United Soybean Board (USB) to innovate and commercialize new industrial uses for soybeans. Our company promotes and advances the use of soybeans and other many other biobased materials in non-food applications. This focus created a niche in the renewable resources market, making us one of only a handful of consulting companies with the breadth and depth of knowledge to service this industry.

Innovation to Commercialization Biobased Chemicals and Materials

- 1 Concept Development**
 - Ideation
 - Differentiation
 - Customer / Market need
 - Intellectual property landscape
 - White spaces
- 2 Market Discovery**
 - Opportunity and trends
 - Addressable market
 - Segmentation
- 3 Technology Approach**
 - Intellectual property development
