

Celanese Corporation.

Celanese Corporation is a global technology leader in the production of specialty materials and chemical products which are used in most major industries and consumer applications. Our products, essential to everyday living, are manufactured in North America, Europe and Asia.

We are one of the world's largest producers of **acetyl products**, which are intermediate chemicals for nearly all major industries. We are also a leading global producer of **high-performance engineered polymers** that are used in a variety of high-value applications.

Foundation:

1912

Turnover:

\$8.5billion (2021)

Employees:

13000

Branches:

>50 manufacturing

27 countries

Key materials:

Engineered Materials, Acetyls, Acetate

Key products:

Clarifoil® Cellulosic Film

Clarifoil® Cellulosic Film.

Celanese was one of the world's first companies to commercialize cellulose diacetate films. For over half a century, we've pioneered and refined this line of materials that are **bio-based** (wood pulp from sustainably forested trees), **biodegradable** and **compostable** and are an excellent alternative to the traditional petroleum-based plastic films commonly used today.

Our diverse product line provides our customers with inspiring, reliable and cost-effective cellulosic film solutions.

Clarifoil® Cellulosic Film is an ideal material for

Carton Windows

Print Lamination

Flexible Packaging

Labels

and many other applications that require technical film solutions with sustainability credentials.

We serve these markets as the world's leading producer of cast cellulosic films for commercial applications and we are proud of the quality and performance of our products.
